# 40<sup>TH</sup> ESCP SYMPOSIUM ON CLINICAL PHARMACY DUBLIN, IRELAND 19-21 OCTOBER 2011

Clinical Pharmacy – Connecting Care and Outcomes

## DEAR COLLEAGUES

*On behalf of the Hospital Pharmacists Association of Ireland, the Irish Pharmacy Union, the Pharmaceutical Society of Ireland, and the European Society of Clinical Pharmacy (ESCP), we are pleased to invite you to the 40th European Symposium on Clinical Pharmacy in Dublin (October 19th -21st, 2011). Patient care at an excellent level is at the core of the practice of clinical pharmacy.*

*But what is “an excellent level”? The answer depends on who is asking and upon the care setting, but it often includes some or other outcome, be it financial, health-related or both. Over the years many studies have been performed that have documented from different perspectives the financial and health-related benefit of clinical pharmacy. Nevertheless, as care becomes more complex and financial constraints grow, there are still challenges attached to linking the care that we provide to definitive end-points, like reductions in mortality and morbidity.*

*Come and join us in Dublin to discuss and learn how to connect care and outcomes through the rational use of IT, the construction of optimal care pathways in chronic disease and in diverse patient populations and settings. During three days you will meet international experts reporting on recent developments, exchange and share knowledge during workshops, oral communications and poster sessions. And naturally since the symposium is in Dublin, you will have ample opportunities for networking and friendly socializing.*
